Product Owner Role

Single Team Scrum	Large Scale Scrum
PO is the single person responsible for the team working on items with the highest ROI	PO is the single person responsible for the team working on items with the highest ROI
PO clarifies PBIs with the team	PO connects team with users / stakeholders needed for clarification
PO accepts / rejects the work	PO typically accepts anything that fulfils the DoD

Five relationships of the PO

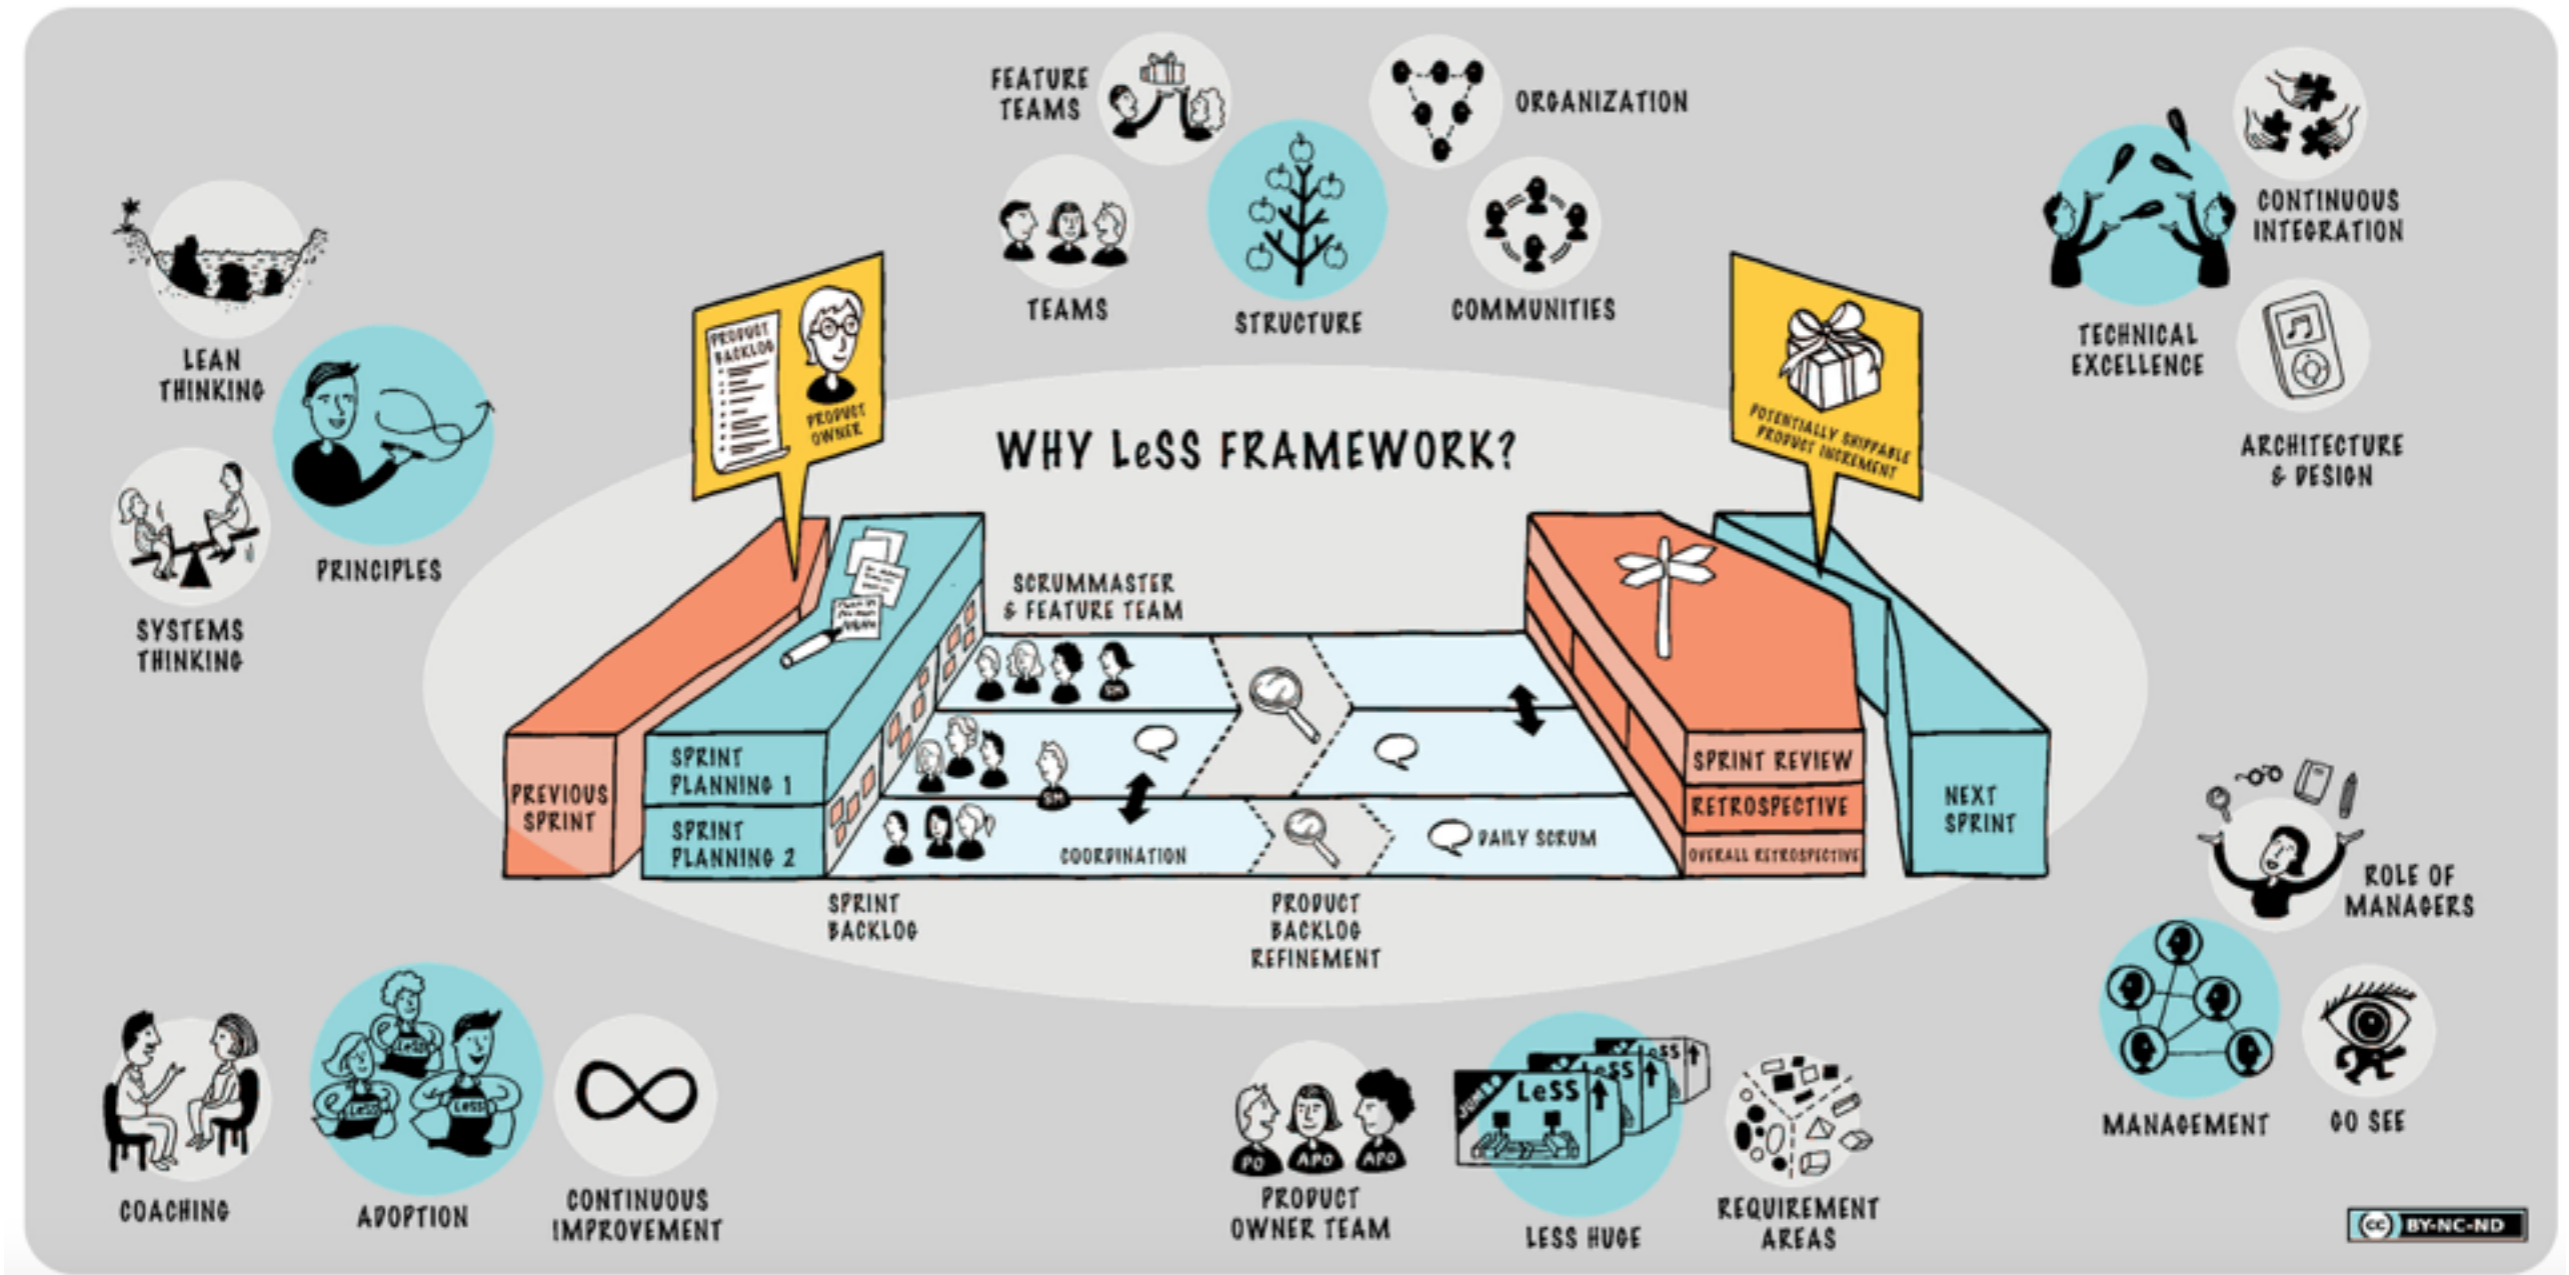

Events with PO participation

Meeting	Planning One	Overall Product Backlog Refinement	Overall Retrospective
Participants	PO + Team Representatives + SM	PO + Team Representatives + SM	PO + SM + Team Representatives + (Managers)
Activities/Focus	<ul style="list-style-type: none"> - teams take items - clear open questions - discuss coordination for upcoming sprint 	<ul style="list-style-type: none"> - split big items - lightweight analysis for basic understanding - estimate - identify strongly related items and apportion items to teams 	<ul style="list-style-type: none"> - issues common to all teams: closeness to customer, CoP, coordination, systematic organisational issues - Is PO doing well?
